JOHNSON AZUBUIKE ANIGBO

Software Engineer | Frontend, Backend, Full-Stack, Cloud & DevOps
anigbojohnsona@gmail.com | github.com/anigbojohnson

PROFESSIONAL SUMMARY

Software Engineer with experience across backend, frontend, full-stack development, cloud infrastructure, and DevOps, backed by 11 years of prior leadership experience in operations and sales management. Builds web applications, APIs, containerised and serverless systems, with hands-on experience across modern software development and AWS cloud technologies. Experienced with JavaScript, TypeScript, PHP, Laravel, React, Node.js, C++, Python, PostgreSQL, MySQL, Redis, Kubernetes, Terraform, Ansible, HashiCorp Vault, and CI/CD using GitHub Actions and ArgoCD. Focused on building secure, scalable applications and automating reliable cloud infrastructure and deployments.

TECHNICAL SKILLS

- **Languages:** C++, Java, JavaScript, TypeScript, PHP, Python, Go, C#, .NET, Swift
- **Web:** React, Next.js, Node.js, Express, Vue.js, Laravel, Django, HTML5, CSS3, Bootstrap, JSON, AJAX
- **Databases:** PostgreSQL, MySQL, MongoDB, SQLite, Redis
- **Cloud (AWS):** VPC, EC2, ALB, Auto Scaling, RDS, EKS, S3, SQS, Lambda, API Gateway, ECR, Route 53, KMS, Secrets Manager, Certificate Manager • also Azure, GCP
- **DevOps & IaC:** Terraform, Ansible, Docker, Kubernetes, Helm, Kustomize, GitHub Actions, ArgoCD, Jenkins, Maven, Bash/Linux
- **Security:** HashiCorp Vault, AWS Secrets Manager, PKI/TLS, OAuth 2.0, JWT, Gitleaks
- **Observability:** Prometheus, Grafana
- **Practices:** Agile, TDD, GitOps, CI/CD, OOP

WORK EXPERIENCE

Software Engineer | Canigbo Pty Ltd
Jul 2024 – Aug 2025

Patient Healthcare Platform

- Built a healthcare platform for patients to request weight-loss treatment, specialist referrals, medical certificates, and telehealth consultations, with registration, authentication, and payment processing.
- Developed the backend in PHP Laravel and MySQL, and the frontend with HTML, CSS, Bootstrap, JavaScript, JSON, and AJAX.
- Integrated Stripe for payment processing and built RESTful APIs to support the application's transaction and referral workflows.

Software Engineer | Segi University
Jun 2020 – Sep 2020

- Built login and sign-up functionality for a mobile Android payment application, with an XML frontend and Java backend.
- Integrated OAuth 2.0 authentication with Google and Facebook.
- Used SQLite for local data management within the application.

Software Engineer | NIIX Asia Pacific (M) Sdn Bhd
Jun 2020 – Sep 2020

- Built a video search and rendering web application, serving over ten thousand users, using PHP, MySQL, HTML, CSS, JavaScript, and Bootstrap.
- Added SEO improvements that increased site visibility, organic traffic, and conversions.
- Researched emerging technologies and wrote technical papers recommending their integration.

Sales Manager | I.N Anigbo and Sons Ltd — Building Materials
Jul 2005 – Oct 2016

- Supervised daily operations and coordinated staff across the business.
- Managed sales transactions and contributed to revenue growth through customer and sales management.
- Maintained stock records, conducted inventory audits, and managed procurement and supplier relationships.
- Handled customer service and financial documentation, and supported strategic planning.

KEY PROJECTS

JJHealth Services — Cloud-Native Healthcare Platform

- End-to-end healthcare platform supporting prescription and weight-loss treatment requests, medical certificates, specialist and pathology referrals, and telehealth consultations, with authentication and Stripe payment integration.
- Built with Laravel and PostgreSQL, plus HTML, CSS, Bootstrap, JavaScript, JSON, and AJAX on the frontend.
- Provisioned AWS infrastructure (VPC, EC2, RDS, EKS, S3, Route 53) with Terraform and Bash, and containerised workloads with Docker and Kubernetes, using Helm and Kustomize.
- Used Redis for caching, session management, and background job queues, including Redis-backed rate limiting on application and authentication endpoints.
- Implemented HashiCorp Vault for centralised secrets management and dynamic AWS credentials, using Vault's AWS secrets engine to issue short-lived credentials for users and infrastructure automation.

- Stored the Vault root token and TLS/bootstrap credentials in AWS Secrets Manager so the Vault environment initialises without hard-coded secrets, and configured Vault PKI/TLS and AWS KMS auto-unseal.
- Automated Vault installation and configuration — setup, credential generation, authentication, PKI/TLS, and policies — with Ansible, integrated with Terraform-provisioned infrastructure.
- Set up CI/CD and GitOps with GitHub Actions and ArgoCD, with Prometheus and Grafana for monitoring, and Gitleaks for secret scanning.

File Transformation and Management System

- File management and transformation platform with OAuth 2.0 authentication (Google and Microsoft), cloud storage, and multi-format conversion for documents, images, video, and audio.
- Built the frontend in React, HTML, and CSS, with Node.js and Python services, MongoDB, JWT authentication, SMTP-based password recovery, and REST APIs.
- Designed an event-driven, serverless AWS architecture — API Gateway, Lambda, and SQS — to expose APIs and process transformation jobs asynchronously.
- Used S3 for file storage and ECR for container images; SQS decoupled upload requests from transformation workloads to improve scalability.

Repository: github.com/anigbojohnsonazubuike/file-transformation

eCommerce System

- Built an eCommerce system with SOAP web services and MySQL CRUD operations for product, pricing, and inventory management.

E-Library System

- Built an e-library system with self-check-in, checkout, and Stripe payment functionality, using HTML, CSS, JavaScript, PHP, and MariaDB.

EDUCATION

Postgraduate Certificate in Advanced Computer Science *Jan 2022 – Aug 2024*
University of Leicester

BSc in Information Technology *Feb 2017 – Sep 2020*
Abertay University / Segi University

ACHIEVEMENTS

- Represented Segi University in a coding competition.
- Awarded a scholarship from Segi University for outstanding academic performance.
