JOHNSON AZUBUIKE ANIGBO

anigbojohnsona@gmail.com | github.com/anigbojohnson

PROFESSIONAL SUMMARY

Experienced business manager and technology professional with over 11 years of leadership experience managing operations at I.N Anigbo and Sons Ltd in the building materials industry. Skilled in supervising business activities, managing staff, overseeing procurement and inventory, and maintaining financial records to support efficient operations and revenue growth.

In addition to my managerial experience, I have technical expertise in software engineering, cloud technologies, and DevOps/GitOps practices — developing scalable digital systems, deploying cloud infrastructure, managing containerised workloads, and implementing CI/CD pipelines using modern tools.

TECHNICAL SKILLS

- Programming Languages: C++, Java, JavaScript, PHP, Python, C#, .NET, Swift
- Web Technologies: HTML5, CSS3, jQuery, JSON, AJAX
- Frameworks & Libraries: React JS, Node.js, Express, Vue JS, TypeScript, Laravel PHP, Maven
- Databases: MySQL, SQLite, MongoDB, PostgreSQL
- CSS Frameworks: Bootstrap
- Web Services: REST, SOAP
- Version Control: Git, Subversion, GitHub, GitOps
- Cloud Platforms: AWS (VPC, EC2, RDS, EKS, Route 53, S3), Azure, Google Cloud Platform
- DevOps & CI/CD: Jenkins, GitHub Actions, ArgoCD, Terraform, Ansible, Bash, Linux
- Containers & Orchestration: Docker, Kubernetes, Helm, Kustomize
- Monitoring & Observability: Prometheus, Grafana
- Security: HashiCorp Vault, Gitleaks
- Methodologies: Agile, TDD, SDLC, OOP, CI/CD, GitOps
- Other: Responsive Web Design, UI/UX Design, Data Structures & Algorithms, Cross-Browser Compatibility

WORK EXPERIENCE

Software Engineer | *Canigbo Pty Ltd — July 2024 – August 2025*

Project: Healthcare System

- Developed a comprehensive healthcare platform enabling patients to request weight loss treatments, specialist referrals, medical certificates, and telehealth consultations with secure registration, login, and integrated payment.
- Built the backend using PHP Laravel and MySQL; front end using HTML, CSS, Bootstrap, JavaScript, and JSON; integrated Stripe payment gateway and RESTful APIs with AJAX.

Software Engineer | *Segi University — July 2020 – September 2020*

- Developed login and sign-up pages of a mobile Android payment application using XML (front end) and Java (back end).
- Integrated OAuth2 for Google and Facebook authentication, enhancing functionality and user engagement.
- Gained hands-on experience with scalable SQLite databases for efficient data management.

Software Engineer | *NIIX Asia Pacific (M) Sdn Bhd — June 2020 – September 2020*

- Developed a high-impact video search and rendering web application using PHP, MySQL, CSS, HTML, JavaScript, and Bootstrap, serving over ten thousand users.
- Integrated SEO features to improve website ranking, increasing organic traffic and conversions.
- Conducted research on emerging technologies and authored papers proposing integration recommendations.

Sales Manager | *I.N Anigbo and Sons Ltd – Building Materials — July 2005 – October 2016*

- Supervised daily business operations and coordinated staff activities to ensure smooth workflow.
- Managed sales transactions and contributed to revenue growth.

- Maintained accurate stock records, conducted inventory audits, and oversaw procurement with strong supplier relationships.
- Delivered customer service support and maintained proper financial documentation.
- Assisted in strategic planning and business decision-making.

EDUCATION

Postgraduate Certificate in Advanced Computer Science
University of Leicester | January 2022 – August 2024

Bachelor's Degree in Information Technology
Abertay University / Segi University | February 2017 – September 2020

KEY PROJECTS

Healthcare System

- End-to-end healthcare platform for prescription requests, medical certificates, and telehealth with secure user authentication and Stripe payment integration.
- AWS infrastructure deployed using Terraform and Bash; containerised with Docker and Kubernetes; CI/CD via GitHub Actions and ArgoCD; monitored with Prometheus and Grafana; secrets managed with HashiCorp Vault.
- Deployed scalable cloud infrastructure on AWS using VPC, EC2, RDS, EKS, and Route 53; automated provisioning with Terraform and Bash scripts.
- Managed containerised workloads using Docker and Kubernetes; implemented CI/CD pipelines with GitHub Actions and ArgoCD following GitOps principles.
- Used Helm and Kustomize for Kubernetes manifest management; monitored infrastructure with Prometheus and Grafana; enforced secrets management with HashiCorp Vault and secret scanning with Gitleaks.

File Transformation and Management System

- Built a system for secure user registration (OAuth 2.0 with Google and Microsoft), file management, and multi-format conversion (documents, images, video, audio) with AWS cloud storage.
- Frontend: React JS, CSS, HTML; Backend: Node.js, Python, MongoDB; JWT and SMTP for password recovery; REST and AJAX for API communication.

Repository: https://github.com/anigbojohnsonazubuike/file-transformation

eCommerce System

- Developed a comprehensive eCommerce system using SOAP web services and MySQL CRUD operations for seamless product management including pricing and inventory.

E-Library System

- Designed and built an e-library with self-check-in, checkout, and payment features using HTML, CSS, JavaScript, PHP, and MariaDB with Stripe integration for e-payments.

ACHIEVEMENTS

- Represented Segi University in a coding competition.
- Awarded a scholarship from Segi University for outstanding academic performance.
